

The ASH Positive List of Publications

The following is a searchable list, in alphabetical order, of publications that have been added to the Positive List of Publications established by the Australian Society of Herpetologists in accordance with its published Position Statement. Included also are non-serial publications that have been added to the list by the process of nomination by the ASH Membership.

[Current as of 20-May-2022]

Table 1. List of publications that are not serials that have been added to the ASH Positive List by the process of nomination by the ASH Membership (Appendix D).

1. Melville, J. & Wilson, S.K. 2019. Dragon Lizards of Australia. Evolution, ecology and a comprehensive field guide. Museums Victoria Publishing, Melbourne. 406 pp.
2. Couper, P.J., Covacevich, J., Amey, A. & Baker, A. (2006). The genera of skinks (Family Scincidae) of Australia and its island territories: diversity, distribution and identification. pp. 367-383 in: Merrick, J.R., Archer, M., Hickey, G.M. & Lee, M.S.Y. (eds). Evolution and Biogeography of Australasian Vertebrates. Auscipub, Oatlands. 942 pp.
3. Cann, J. and Sadler, 2017. Turtles of Australia. CSIRO Publishing, Canberra.
4. MJ Tyler & P Doughty. Field Guide to the Frogs of Western Australia. 2009 (4th Edition). Western Australian Museum, Perth, Australia.

Table 2. Alphabetic list of journals on the ASH Positive List. This list contains journals on the Web of Science Core Collection (as of 21-Aug-2021)(Appendix A), scientific journals of Major Museums (as of 21-Aug-2021) (Appendix B), additional journals explicitly added by the Taxonomic Committee at the inception of the Positive List (Appendix C), and journals added by the process of nomination by the ASH Membership (Appendix D).

Web of Science Core Collection contribution to Initial List of Journals

The following are an extract of relevant journals listed in the Web of Science Core collection (as of 21-Aug-2021); this is a subset considered by the ASH Taxonomic Committee as relevant to the Official List of Australian Amphibians and Reptiles.

Highly Relevant to Herpetology

Acta Herpetologica
African Journal of Herpetology
American Museum Novitates
Amphibian and Reptile Conservation
Amphibia-Reptilia
Asian Herpetological Research
Biological Journal of The Linnean Society
Bulletin of The American Museum of Natural History

Journals added to the Initial List of Journals by the ASH Taxonomic Committee at the inception of the Positive List

The following is a list of journals placed on the initial list of journals in the ASH Positive List by explicit decision of the ASH Taxonomic Committee. The foundation for adding these is that issues of the journals published post January 1 2000 contain nomenclatural acts that were of relevance to decisions already made on the ASH Official List of Species of Australian Amphibians and Reptiles. Subsequent additions need to be made by nomination.

- Megataxa
- Bionomina
- Bulletin of Zoological Nomenclature
- Caribbean Herpetology
- The Herpetological Journal
- Herpetofauna
- Dumerilia
- Journal and Proceedings of the Royal Society of New South Wales
- Journal of the Royal Society of Western Australia
- Papers and Proceedings of the Royal Society of Tasmania
- Proceedings of the Royal Society of Queensland
- Proceedings of the Royal Society of Victoria
- Hamadryad (to and including Volume 38, 2018)

Note: Hamadryad discontinued in 2018, replaced by newsletter format under the same name.

Note: Justifications available on request

[Current as of 1-Apr-2022]

1. **Melville, J. & Wilson, S.K. 2019. Dragon Lizards of Australia. Evolution, ecology and a comprehensive field guide. Museums Victoria Publishing, Melbourne. 406 pp.**

Nominated: Glenn Shea

Seconded: Scott Keogh, Paul Oliver

Agreed, Monday Dec 13 2011, in session.

Notes: We do not encourage the publication of nomenclatural acts in books, but admit that this work was published before the establishment of the Official List. This decision should not be taken as a precedent. This action is required so as not to have us revert the name *Tympanocryptis lineata* to the South Australian species (the change of application of name of *lineata* to a New South Wales species was first made by Melville & Wilson, 2019) in the soon to be approved Official List. The work, although not a serial, was published by one of our listed Museums.

2. **Couper, P.J., Covacevich, J., Amey, A. & Baker, A. (2006). The genera of skinks (Family Scincidae) of Australia and its island territories: diversity, distribution and identification. pp. 367-383 in: Merrick, J.R., Archer, M., Hickey, G.M. & Lee, M.S.Y. (eds). Evolution and Biogeography of Australasian Vertebrates. Auscipub, Oatlands. 942 pp.**

Nominated Glenn Shea

Seconded: Scott Keogh, Jane Melville

Agreed, Monday Dec 13 2011, in session.

Notes: Without this action there would be no resolution as to which of the three generic names created by Wells & Wellington (1985: *Carinascincus*, *Litotesincus* or *Tasmascincus*) would have priority for application to the single lineage currently recognised. Priority was formally given to *Carinascincus* by Couper et al. (2006. pp. 367-383 in: Merrick, J.R., Archer, M., Hickey, G.M. & Lee, M.S.Y. (eds). Evolution and Biogeography of Australasian Vertebrates. Auscipub, Oatlands), as first revisor, and is accepted in the soon to be approved Official List

3. **Cann, J. and Sadlier, 2017. Turtles of Australia. CSIRO Publishing, Canberra.**

Nominated: Arthur Georges

Seconded: Scott Keogh, Jane Melville

Agreed, Monday Dec 13 2011, in session.

Notes: We do not encourage the publication of nomenclatural acts in books, but admit that this work was published before the establishment of the Official List. This decision should not be taken as a precedent. This book is a revision of the 1998 book (pre Jan 1 2000). The 1998 book and the

2017 revision has been heavily referred to in the formulation of the Official List of Turtles. Published by CSIRO, a premier scientific organisation.

4. Australian Journal of Taxonomy – launched in May 2022.

Nominated: Scott Keogh
Seconded: Glenn Shea, Jane Melville

Agreed Monday Dec 13 2011, in session.

This journal is approved in advance of its inaugural issue. It is an online peer reviewed journal to be produced by Taxonomy Australia. Overall governance is provided by an Editor-in-Chief and a panel of Managing Editors, appointed by the Taxonomy Australia Steering Committee, which has broad representation from the Australian taxonomy sector.

5. MJ Tyler & P Doughty. Field Guide to the Frogs of Western Australia. 2009 (4th Edition). Western Australian Museum, Perth, Australia.

Nominated: Paul Doughty
Seconded: Scott Keogh, Arthur Georges

Agreed, Monday Dec 20 2011, out of session.

Notes: We do not encourage the publication of nomenclatural acts in books, but admit that this work was published before the establishment of the Official List. This decision should not be taken as a precedent. Fourth edition of a book published before January 1, 2000. This action is required so as to recognise the taxonomic action of changing *Opisthodon* to *Platyplectrum* in the soon to be approved Official List. The work, although not a serial, was published by one of our listed Museums.

6. The Batagur Monographs

Nominated: Andrew Amy
Seconded: Harold Cogger, Simone Blomberg

Rejected on a 12 to 5 vote of the ASH Taxonomic Committee on 30-Mar-2022.

Notes: The primary consideration appeared to be the lack of a Chief Editor with suitable qualifications and the lack of an Editorial Board, let alone one comprised of eminent scientists who are experts in the field. Other considerations related to accessibility to the journal and the independence of peer review. The Committee acknowledged the standing of the Editor in the arena of herpetoculture and as an advocate for turtle conservation, and acknowledged that he, the authors of articles and the peer reviewers revealed by open process, were acting in good intent, and were not in this regard, in the class of so-called "taxonomic vandals". The Committee would welcome a renomination of the Batagur Monographs should they establish governance commensurate with the norms of scientific publishing, which would include a suitably qualified Chief Editor with an Editorial Board of suitably qualified and eminent scientists in the field, including at least one eminent taxonomist.
